

**Adjusting to the EU-Guidelines RoHS (Restriction of hazardous Substances)**

Dear Customers,

We are planning to adjust our fabrication process to the EU-Guidelines RoHS by the end of year 2004.

From the 1<sup>st</sup> of January 2005 onwards the Deltron AG production will exclusively operate according to the new procedure. However until our stock is completely used up, there could be the possibility that one or the other part which is delivered does not meet the new guidelines yet.

Products which we do not produce our self's (merchandise) will be changed at the latest by July 2006. Several of our subcontractors already produce according to RoHS or are planning to change by the end of 2005. If you need any more detailed information, please do not hesitate to contact our Product Managers, they will kindly assist you.

We very much look forward to continue with our good cooperation.

Best regards,

Deltron AG
